

How do you know which size speaker and thintube you need? Online-hearingaids.com helps you with that.

- Print out this document at 100% scale
- Then cut out both tools (left and right) along the dotted line
- Then place the tool over the correct ear as shown in the picture
- Choose the number closest to the opening of your ear canal. See the arrow in the image
- Order the size this tool shows
